

Steel is our passion

Franz Grosschädl is one of the most experienced steel companies in Austria. We are an innovative family-owned company based in Graz-Eggenberg with branches in Wiener Neustadt and ESB Betonstahl in Graz-Puntigam and so are perfectly placed for customers in Austria, Europe and beyond.

Quality, experience, reliability and flexibility are the cornerstones of our business. Our extremely diverse product range and our continual interest in and adoption of the latest finishing and processing techniques mean that we can deal with even the most challenging customer demands.

Here is just a selection of what we offer: steel bars and rods, sheet metal, beams and girders, tubes and pipes, steel sections, welded mesh, welding rod, aluminium, stainless steel, high-grade steel, bright steel, blasting, coatings.

Our extremely diverse product range and our continual interest in and adoption of the latest finishing and processing techniques mean that we can deal with even the most challenging customer demands. Our large warehouse capacity and comprehensive high-quality product range ensure that orders can be delivered to our customers in Austria and abroad in the shortest possible time. Because: **Steel is our passion.**

Services:

Steel bars and rods
Sheet metal
Support sections - S235JR
Support sections – S355J2
Tubes and pipes
Steel sections
Fences, grids and grills
Welded mesh
Corrugated sheets
Welding rod
Stainless steel and aluminium
Bright steel
Blasting
Surface coatings

A cut above the rest

Flame cutting has been a central part of the Grosschädl business for many years. Our motto has always been, **“We cut any material in any thickness”**. Two plasma torches and 18 oxy-fuel torches keep production running smoothly and can easily tackle material thicknesses of 3 to 260 mm and plate dimensions from 6 x 2 m to a maximum of 12 x 3 m.

We are TÜV-authorized to transfer 3.1 inspection certificates for all deliveries in accordance with EN 10204.

Flame cutting About 4 000 tonnes of material in the following qualities are always available:

Plasma cutting	S235JR+AR
Heavy plate	S355J2+N
Processing	16MnCr5-N
Blasting – up to a width of 3 m	42CRM04-N
Wear-resistant steel plates 360 HB and above	

Grosschädl offers the whole spectrum of modern steel reinforcement bar processing at its works in Graz-Puntigam. Whether rods or coils, formwork for the building industry, cutting, bending, standard formwork for individual and strip footings or installation on-site, and much more – our dedicated team, supported by the latest in production technology, is ready and able to answer any questions you may have. No matter what the requirements: the building industry relies on the knowledge, experience and quality that Grosschädl delivers.

BST 550
Reinforcing mesh A, AQ
ÖMAT “loop end” mesh
Rebar shapes
Cutting, bending
Couplers
Installation
Stremaform
Pecafil

Steel for even the most demanding requirements...

...Grosschädl has it! Our diverse product range, custom solutions and just-in-time deliveries made possible by the latest warehouse logistic systems mean that we are your first choice for aluminium, stainless steel, commercial steel and high-grade steel. **Shaping the future – in partnership with our customers.**

We offer:

- ✓ The fastest cutting operation in Austria!
- ✓ An experienced team guaranteeing perfect processing
- ✓ State-of-the-art plasma and oxy-fuel cutters giving you the highest-possible precision
- ✓ Accurate cutting exactly to your specifications
- ✓ All material thicknesses
- ✓ Our own transport fleet
- ✓ Just-in-time deliveries
- ✓ TÜV authorisation to transfer 3.1 inspection certificates
